Chairwoman DeLauro and Ranking Member Granger,

I am requesting funding for Drainage & Resilency Improvements in North Lake Charles in fiscal year 2023.

The entity to receive funding for this project is the City of Lake Charles, located at 326 Pujo St., Lake Charles, Louisiana 70601.

The funding would be used to retrofit antiquated roads and ditches that would improve drainage, resiliency, flooding, economic revitalization, property values, stormwater management, water and wastewater quality, and public health (fewer mosquitoes). This project will benefit public safety, public health, homeowner property values, repopulation after storm damages. This project will lower cost of future recovery, saving FEMA, SBA, and Federal Flood Insurance Program money in long run.

I certify that neither I nor my immediate family has any financial interests in this project.

Respectfully

Clay Higgins
Member of Congress
